MANAGE BEHAVIOR

WITH
LESSON VISUAL &
TEACHER'S NOTES

BEHAVIOR BITCOIN

This 21st century behavior system is both fun and educational! Much like behavior bucks but instead with bitcoin, you can manage behavior as well as educate students on this increasingly popular digital currency. It easily supports your existing behavior management plan by acknowledging students for making good choices. Following class rules, staying on task or focusing on technology goals and mastering new skills.

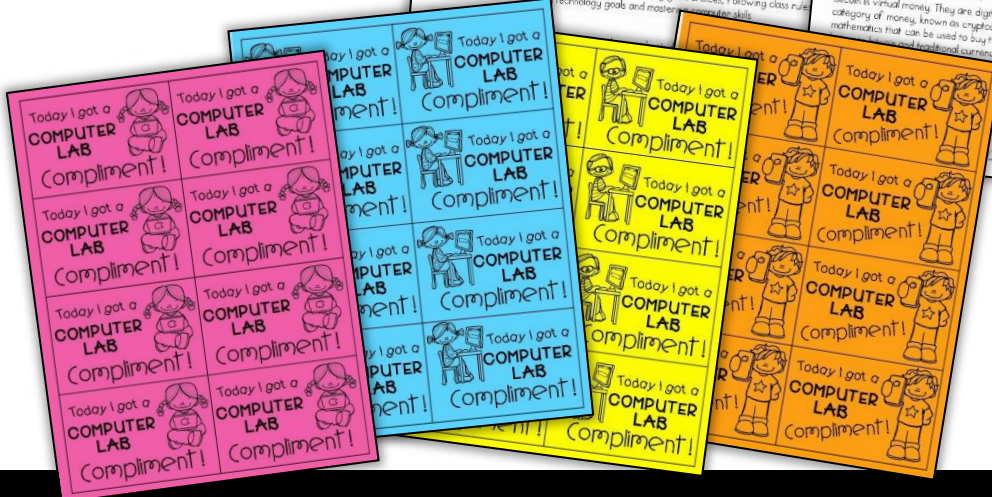

WHAT IS BITCOIN?

Bitcoin is virtual money. They are digital coins you can send through the internet. This category of money, known as cryptocurrency, is an electronic payment system based on mathematics that can be used to buy things electronically. The most important difference between virtual and traditional currency is that bitcoins aren't printed like dollars and banks.

Nakamoto, increasing numbers of people are using Bitcoin to make purchases both online and in person.

TEACHER NOTES

LOGIN SUPPORT

COMMUNICATE WITH TECH SUPPORT

MANAGE CHECKOUTS

Students with its own and easy barcode logins

Customize separately to create

Use these pages to keep track of laptops, Chromebooks, and device checkout/return. Use the included sheets or customize your own for any other items that are borrowed and returned. Use the editable binder covers and forms in the

MANAGE STUDENT TASKS

Cut down on transition time and get students to work quickly by placing websites and directions next to your computers or in student's center folders. Great for web quests or tasks with multi-step directions, early finisher activities, or must do and may do activities. Use the pages as is or reduce and print 2 per page

*Customize the pages using the editable version located in the separate PowerPoint file

ORGANIZE YOUR LAB

Label computers, baskets and headphone storage with numbers so students can find their seat and supplies quickly. Editable versions of all 3 label styles are located in the PowerPoint file included in your download.

If headphones are kept in the lab at your school, place them in a plastic shoebox from Dollar Tree next to each computer. This prevents headphones from falling to the floor, being stepped on, tripped over, and broken.

MANAGEMENT TIP:

Assign students a number at the start of the year. This will determine which computer and use each time they visit the lab or use classroom computers.

EDITING THE FORMS

*Editable versions of all forms are located in the separate PowerPoint file included in this download.

KG Second Chances Solid 32pt.

MAKE IT A GRANDE ALL CAPS 44pt.

KG Miss Kindergarten 48pt.

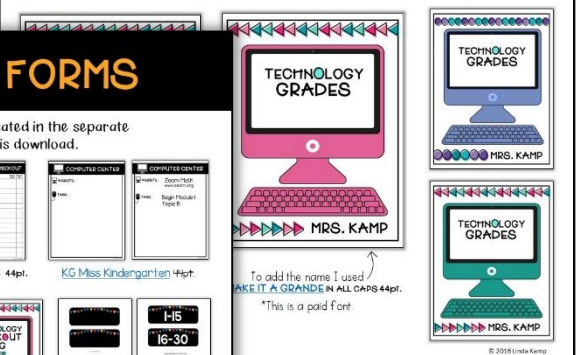

I have included the names and point sizes of the Fonts I used on the existing forms, however you can use any font you wish *See the EDITING THE POSTERS page for directions on how to install fonts on your computer

1. Choose the font you wish to use
2. Insert a text box onto the slide and type your text
3. Change the font color to white if necessary
4. Save the PowerPoint with your changes as a PDF

ORGANIZE GRADES

Give your projects

To add the name I used MAKE IT A GRANDE IN ALL CAPS 44pt. *This is a paid font.
