headphones
back in the box

Keep your
hands to
yourself

Be careful
with the
computers

Always leave
your work
space clean

Remember to
push in
your chair

Get started
right away

*Editable versions of the posters are located in the separate PowerPoint file included in this download.

1. Choose the font you wish to use. I used KG Next To Me Solid in 72 pt. For the drawing order, this font is best for personal (non-commercial) use. Click on the blue link to go directly to the font on www.dynamilis.com. After downloading the font, you will need to install it on your computer. To do this on a PC, go to your computer's control panel and open the folder called 'Fonts'. Drag the fonts you wish to install into the folder. You may have to restart your computer for fonts to appear in your font selection. If you need additional help, here are 2 great tutorials on installing fonts on PC and Mac operating systems: <http://www.fontbundles.com/tutorials/101/> <http://www.dynamilis.com/2012/07/10/101-tips-for-how-to-install-fonts/> <http://www.dynamilis.com/2012/07/10/101-tips-for-how-to-install-fonts/>

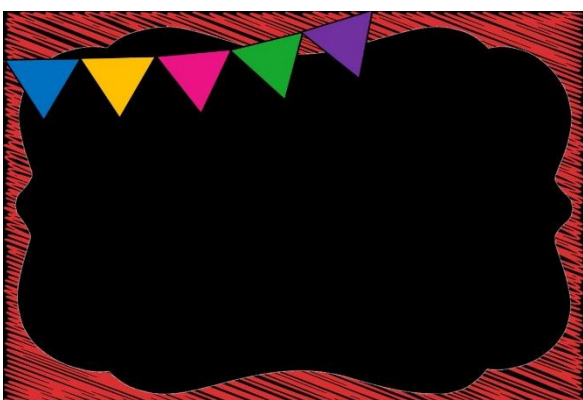

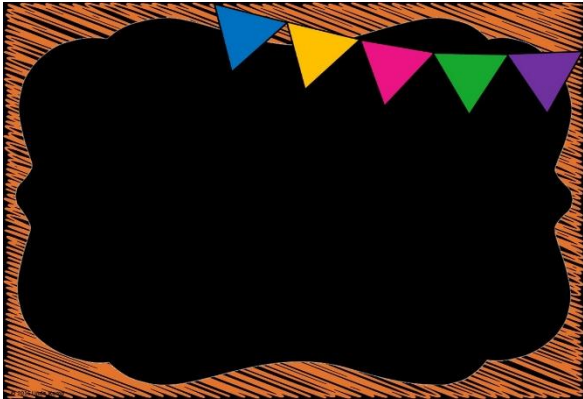

2. Insert a text box onto the slide and type your text.
3. Change the font color to white.
4. Save the PowerPoint with your changes as a PDF.
5. Open the PDF and print.
