IMPORTANT PRINTING TIPS - PLEASE READ

NOTE: After editing File 2 or File 3, you will need to save the files as a PDF before printing. To avoid printing issues, please follow these steps:

1. Make sure you have the latest version of Adobe Reader. The source contains many graphics and images which can sometimes result in black bars on the page or missing text if you are using an older version of Adobe Reader. It is not an issue with the file. It is a common problem easily fixed by installing the latest version of Adobe Reader from Adobe.com.

2. Issues can arise if you are trying to print after opening the file in "Preview" rather than "Open With" first. "Preview" is the default setting so be sure to check that.

3. If you are experiencing difficulties here is helpful advice from TPT Support:
